

## Amherst Water Utility

**MEDIA RELEASE #2010099**

Thursday, June 3, 2010

Please be advised that due to the heavier amount of turbidity found in the Tyndal Road and John Black Road, water transmission main the Amherst Water Utility will be performing an additional night of water main flushing during **this evening, Thursday, June 3**, between the hours of **7:00 PM** and **8:00AM** on the Tyndal Road, Duckling Dell and John Black Road areas of the water system.

During this time you may experience dirty water and low water pressure. We suggest that you may want to run some for reserve. You may need to allow your cold water to run for a period until it becomes clear during this time. We suggest that you thoroughly flush your system following this time to release any air and sediment from your system. The Amherst Water Utility apologizes for any inconvenience this may cause its customers.

Should you have any questions or concerns please call 667-3334.

Thank You,  
Amherst Water Utility
